Philips
Portable DVD Player

23 cm/9" digital LCD

3-hr playtime HDMI

PB9001

Blu-ray goes everywhere with you

with HDMI for HDTV enjoyment at home

Now you can watch Blu-ray and DVD movies anywhere - on the terrace, on holiday or travelling. What's more, you can play other digital video formats directly from USB sticks. Back at home, you get to enjoy cinematic full HD on TV via HDMI.

Play your movies, music and photos on the go

- Blu-ray Disc playback for sharp images in full HD 1080p
- DVD, DVD+/-R, DVD+/-RW, (S)VCD, CD compatible
- DivX Plus HD Certified for high-definition DivX playback
- Hi-Speed USB 2.0 Link plays video/music from USB flash drives

Enrich your AV entertainment experience

- 9" high density (800 x 480 pixels) LCD display
- BD-Live (Profile 2.0) to enjoy online Blu-ray bonus content
- Dolby TrueHD and DTS-HD MA for HD 7.1 surround sound
- DVD video upscaling to 1080p via HDMI for near-HD images

Extra touches for your convenience

- Enjoy up to 3 hours playback with a built-in battery*
- Full Resume on Power Loss
- Travel bag included

PHILIPS

sense and simplicity

Portable DVD Player

PB9001/05

Highlights

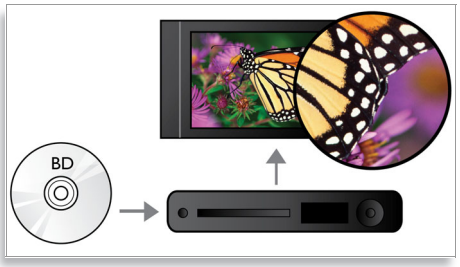
Power Resume

The DVD-Video player remembers where you finished viewing a DVD and continues playing from the exact scene where you stopped watching, even after a power failure. If you did not take the disc out of the player, simply press play and it will resume play where you stopped the movie. If you did take the disc out of the player, just reload the disc and press "play" followed by "resume" on the remote control. The Philips DVD-Video player makes life easy!

BD-Live (Profile 2.0)

BD-Live opens up your world of high definition even further. Receive up-to-date content just by connecting your Blu-ray Disc player to the Internet. Exciting new things like exclusive downloadable content, live events, live chats, gaming and on-line shopping all await you. Ride the high definition wave with Blu-ray Disc playback and BD-Live

Blu-ray Disc playback

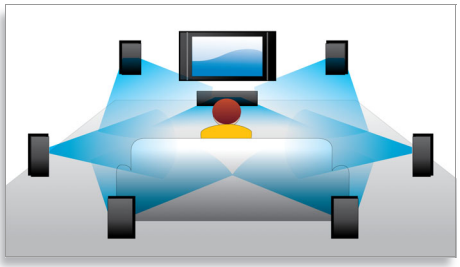


Blu-ray Discs have the capacity to carry high definition data, along with pictures in the 1920 x 1080 resolution that defines full high definition images. Scenes come to life as details leap at you, movements smoothen and images turn crystal clear. Blu-ray also delivers uncompressed surround sound — so your audio experience becomes unbelievably real. The high storage capacity of Blu-ray Discs also allows a host of interactive possibilities to be built in. Seamless navigation during playback and other exciting features such as pop-up menus bring a whole new dimension to home entertainment.

DivX Plus HD Certified

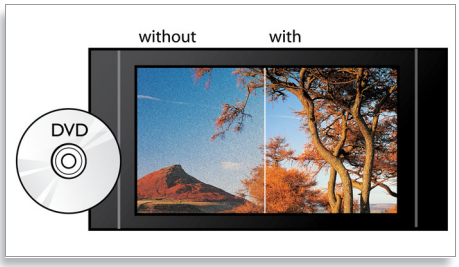
DivX Plus HD offers the latest in DivX technology to let you enjoy HD videos and movies from the Internet direct to your Philips HDTV or PC. DivX Plus HD supports the playback of DivX Plus content (H.264 HD video with high-quality AAC audio in an MKV file container) while also supporting previous versions of DivX video up to 1080p. DivX Plus HD for true HD digital video.

Dolby TrueHD and DTS-HD MA



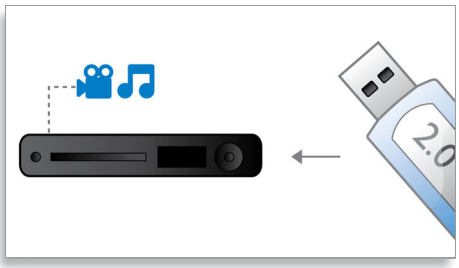
DTS-HD Master Audio and Dolby TrueHD deliver 7.1 channels of the finest sound from your Blu-ray Discs. Audio reproduced is virtually indistinguishable from the studio master, so you hear what the creators intended for you to hear. DTS-HD Master Audio and Dolby TrueHD complete your high definition entertainment experience.

DVD video upscaling



HDMI 1080p upscaling delivers images that are crystal clear. DVD movies in standard definition can now be enjoyed in high definition resolution - ensuring more details and more true-to-life pictures. Progressive Scan (represented by "p" in "1080p') eliminates the line structure prevalent on TV screens, again ensuring relentlessly sharp images. To top it off, HDMI makes a direct digital connection that can carry uncompressed digital HD video as well as digital multi-channel audio, without conversions to analogue - delivering perfect picture and sound quality, completely free from noise.

Hi-Speed USB 2.0 Link



The Universal Serial Bus or USB is a protocol standard that is conveniently used to link PCs, peripherals and consumer electronic equipment. Hi-Speed USB devices have a data transfer rate of up to 480 Mbps - up from the 12 Mbps of original USB devices. With Hi-Speed USB 2.0 Link, all you have to do is plug in your USB device, select the movie, music or photo and play away.
